

METHOD AND DEVICE FOR SANITATION USING BACTERIOPHAGES

ABSTRACT OF THE DISCLOSURE

Methods and devices for sanitation using bacteriophage are disclosed. According to one embodiment of the present invention, a method for sanitation
5 using at least one bacteriophage includes the steps of (1) storing the at least one bacteriophage in a container; and (2) applying the at least one bacteriophage to a surface to be sanitized with a dispersing mechanism. According to another embodiment of the present invention, a sanitation device that dispenses at least one
10 bacteriophage includes a container, at least one bacteriophage stored in the container, and a dispersing mechanism that disperses the at least one bacteriophage from the container.
